

That the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

I should not have to worry about being bothered at home by telemarketers. This is my private telephone that I pay for that is for my own personal use and not for someones business opportunities.

Indiana's laws work just fine and do not at this time need to be interfeared with.

It.s My Home!

It's My Phone! and I don't want them their!!!!
